Introduction scene

Dark outdoor setting. Minimal lighting above the entrance. A player walks to the closed double doors. Menu pops up "Concert; Conference; Wedding; Tutorial". Player chooses one of the options and opens the doors.

Player manually opens the door or do they just press a button?

Sound: Domestic pressures – Johann Johannsson 00:44

It is dark inside. Everything is empty. A person can walk to Front of The House (FOH). FOH is positioned facing the stage where a person can clearly see the rig. There is a console that can control lights. Button 1 turns all the lights on (white), Button 2 changes colours (2 colours per click) (red (#cf2323) and purple (#8b25cf); pink (#f78de9) and blue (#8dd9fc); white (#ffffff) red (#cc2121); green (#2eb82e) and pink (#e846e8); front truss should have yellow spotlights.

Fader 1 controls blinking speed (barely up-10% = slow blinking 5 beats per minute (bpm); 100% fader = 200 bpm). Fader 2 controls smoke (same concept as fader 1).

Both buttons and faders slightly light up when used (#e9fbff colour).

A player can also move to the left to turn on the music (we can use the same console model with 1 button only). If a player clicks on the button, the music starts. The second click switches the song. When the button is used, it lights up with #7ab85c.
